Stefan Lotz

Data Analyst, City of Cape Town

stefanlotz.github.io

Skills

- Application of mathematical and statistical modelling to real-world problems
- Programming in Python, Matlab, R, and Zig
- Production of written reports, manuscripts and documentation
- Production of professional technical talks and slide decks
- Mentoring of post-graduate students and junior staff

Experience

Data Analyst, City of Cape Town

2026 − current

- Develop and deploy statistical models & data products for City of Cape Town line departments
- Present findings to internal and external stakeholders
- Collaborate with stakeholders to understand City needs and translate these into analytic questions, designing appropriate approaches and solutions using statistical methods

Extraordinary Professor, Faculty of Engineering, North-West University

2020 − current

- Unpaid position in MUST Deep Learning research unit
- Post-graduate (MEng) student supervision in deep learning research
- Delivered 4 MEng students, 2 in process

Research Scientist, South African National Space Agency

2014 − 2026

- Research scientist in space physics, solar physics and geomagnetism
- 22 peer-reviewed publications in national and international journals

stefanlotz@gmail.com October 2026

- 2 PhD students, 10 MSc or MEng, 5 BSc (Hons) students delivered
- Several competitive research grants held and managed. Total cumulative value of about R10m.
- National Research Foundation C2 rating

Education

PhD in Physics

Rhodes University, 2012

MSc Physics

Rhodes University, 2009

BSc (Hons) Physical and Mathematical Analysis

University of Stellenbosch, 2006

BSc Physical and Mathematical Analysis

University of Stellenbosch, 2006
